ECO INTEGRITY ASSURED

Attached is our new Eco Integrity Assured Statement, which highlights the ECO benefits of Design Pine.

More and more dealers and users are categorizing Design Pine as an ECO Positive product with a user safe profile.

The ECO INTEGRITY ASSURED tool is worthy of addition to your sales and marketing arsenal.

Environmental and Health & Safety Statement

- Design Pine is produced from renewable Plantation Pine.
- Design Pine uses an organic treatment process and is compliant with US EPA requirements.
- Design Pine uses TECO tested & ASTM compliant glue systems, thus being safe and environmentally acceptable.
- Design Pine uses a sophisticated coating system that is correctly adhered, safe and environmentally acceptable.
- Design Pine is an all wood product. As such, the process of growing the wood fiber, producing the finished product through safe and responsible processes and ensuring an environmentally friendly after life through acceptable disposal methods, means Design Pine is ECO friendly.

This mark symbolizes ITI's commitment to offering wood products of the highest quality. It represents our systematic approach to always producing a superbly engineered product. This journey takes us from sourcing superior plantation pine, through to using the most scientifically advanced organic treatments for wood preservation, and finishes with safe, attractive coatings that will outperform the market. It also represents our assurance ITI's wood products have been grown, milled and treated in accordance with the principles of conservation and sustainability.
